

ANSELM FAJOBI

FULL STACK & MOBILE DEVELOPER

Lagos, Nigeria | +234 915 203 3235 | Pulumbu11@gmail.com |
[LinkedIn](#) | [GitHub](#) | [Portfolio](#) | Open to Relocation

SUMMARY

Visionary Full-Stack and Web3 Developer specializing in high-performance decentralized systems, AI-driven applications, and scalable mobile platforms. Proven track record of architecting robust smart contracts, deploying Solana/EVM infrastructure, and leading agile teams to ship high-traffic consumer apps. Passionate about merging complex cryptography with seamless UI/UX to build undeniable digital experiences. Open to global remote, hybrid, and relocation opportunities.

TECHNICAL SKILLS

Category	Skills
Frontend	HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Next.js, GSAP, Three.js
Backend	Node.js, Express.js, RESTful APIs, Python, Ether.js, Solana web3js, Rust
Mobile Development	React Native
CSS Frameworks	Bootstrap, Tailwind CSS
Tools & Technologies	Git/GitHub, AWS, Google Cloud APIs, CMS (Sanity.io, Contentful)
Certifications	Coursera Web Development in HTML, CSS, and JavaScript; Coursera Cloud Computing; Edu2Work Software Development

WORK EXPERIENCE

Alpha Development

Fullstack & Blockchain Developer | Lagos, Nigeria

April 2024 – Present

- Designed and deployed user-friendly interfaces for blockchain projects, improving UI/UX by 30% and boosting user retention by 20%.
- Built and optimized landing pages under tight deadlines, contributing to business growth and a 15% increase in site speed.
- Developed multiple Ethereum Virtual Machine (EVM) listing bots, enhancing automation and operational efficiency by 40%.
- Enhanced a Python-based Telegram bot for Solana, adding PNL calculations and automated notifications, streamlining financial tracking for clients.
- Integrated cutting-edge blockchain technologies, expanding service offerings and increasing project success rates by 35%.

Caleb University

Lead Full Stack Developer | Lagos, Nigeria

September 2023 – July 2024

- Spearheaded the development of Flickshot, a TikTok-inspired social media application, managing both frontend and backend components. The app is live and featured in the portfolio.
- Led a team of three developers, ensuring timely delivery of project milestones and fostering effective collaboration through strong leadership.

Independent Full Stack Developer

Freelance | Lagos, Nigeria

June 2019 – August 2023

- Architected and deployed custom web applications and scalable digital solutions for various international and local clients, establishing a foundation in full-stack architecture.
- Built early iterations of automated trading scripts and explored fundamental blockchain integrations, paving the way for advanced Web3 and smart contract engineering.
- Managed end-to-end client lifecycles, from initial UI/UX wireframing to backend deployment and server maintenance.

Essential

Mobile Developer | Lagos, Nigeria

February 2024 – April 2024

- Created a full-stack mobile application for Eride, enabling seamless ride booking and driver registration. Managed all aspects of development, including backend, frontend, security, and user authentication.
- Enhanced application security and user authentication processes, increasing user trust and retention by 20%.
- Featured in a video presentation demonstrating app functionality and user benefits, available on portfolio website.

Pintop Technology

Web Developer Intern | Lagos, Nigeria

May 2024 - November 2024

- Developed visually appealing user interfaces for high-traffic websites, reducing bounce rates by 25% and increasing user engagement by 30%.
- Delivered a full-featured dashboard website in two weeks, improving administrative efficiency by 40%.
- Designed and deployed a responsive fashion website, enhancing user experience and increasing client portfolio value by 20%.
- Optimized cross-device compatibility, achieving a 35% improvement in accessibility and user satisfaction.
- Collaborated on real-world projects, boosting development speed by 15% while ensuring high-quality outcomes.

PROJECT HIGHLIGHTS

Apple iPhone 15 Website Clone

(View Live: <https://da-apple-website.vercel.app/>)

- Spearheaded the development of a visually stunning website using React, GSAP, and Three.js, incorporating advanced animations and 3D models.
- Achieved a 30% increase in user interaction and engagement through immersive design and live animations, creating an unparalleled browsing experience.
- Delivered the project under a tight deadline, earning praise for innovation and technical excellence.

Flickshot - Social Media Application

(View Live: <https://flickshot-final.vercel.app>)

- Led a team of three developers to build Flickshot, a TikTok clone for video sharing.
- Developed the frontend and backend architecture, implementing robust authentication, video upload features, and responsive UI, while mentoring team members who focused on the upload frontend.
- Successfully launched the platform, achieving a 40% faster video upload time and positive user feedback for its intuitive interface and seamless performance.

Blockchain Automation and Monitoring Tools

- Successfully developed and deployed Ethereum Virtual Machine (EVM) listing bots using Node.js, TypeScript, Ether.js, and Infura API, automating token tracking and reducing manual workload by 50%.
- Designed a Solidity-based Telegram buy bot to monitor whale transactions, providing real-time alerts for wallets holding over \$10k, improving transaction monitoring efficiency by 70%.
- Enhanced a Python-based Telegram bot for Solana, adding PNL calculations and automated notifications in just two weeks, streamlining financial tracking for blockchain

Doux Crypto Wallet

(View Live: <https://apps.apple.com/ng/app/doux-crypto-wallet/id6753561819>)

- Engineered core functionalities for a high-performance fintech application facilitating seamless international cross-border transfers, secure cryptocurrency asset deposits, and real-time crypto-to-Naira (NGN) conversion protocols.

Veilo: Privacy Wallet Infrastructure

(View Live: <https://www.veilo.network/>)

- Developed a comprehensive privacy wallet infrastructure on the Solana blockchain.
- Engineered secure zero-knowledge transfer mechanisms enabling private fund transactions.

AiForge: Decentralized AI Marketplace

(View Live: <https://www.aiforge.xyz/>)

- Built a decentralized AI marketplace allowing users to purchase, customize, and deploy bespoke autonomous AI agents for various automated tasks.

Spiderpig BNB: Meme Token Ecosystem

View Live: <https://www.spiderpigbnb.wtf/>

- Created a Meme Token ecosystem on the Binance Smart Chain featuring an autonomous AI agent that dynamically generates and publishes token-related memes to X.

KOLy Market: AI-Powered Prediction Market

(View Live: <https://koly-market-ui-wzo6.vercel.app/>)

- Developed an AI-powered prediction market utilizing advanced LLMs to dynamically hype winning bettors or roast losing wagers regarding daily Key Opinion Leaders.

Breakthrough Radio: Cross-Platform Mobile Application

(View Live: <https://apps.apple.com/ng/app/breakthrough-radio/id6749084299>)

- Engineered a cross-platform mobile application for a religious organization, successfully deploying robust audio streaming capabilities to both the Apple App Store and Google Play Store.

Vaultspin: Gamified Crypto Casino Platform

(View Live: <https://vaultspin-optimized.vercel.app/>)

- Built a large-scale, gamified crypto casino platform where users engage in PvP item battles to win luxury goods, fully funded via cryptocurrency.

Bananagun.io: Cross-Chain Token Swapping Platform

(View Live: <https://bananagun.io/>)

- Contributed to a cross-chain token swapping platform, facilitating seamless exchanges between fiat currencies and standard cryptographic tokens across multiple blockchains.

Gifts and Giggles: Custom E-commerce Platform

(View Live: <https://www.giftsngiggles.ca/>)

- Architected a custom, high-performance e-commerce platform for a floral/gifting business, focusing on the customer purchasing journey and inventory logic.

Above The Grovnd (ATG): E-commerce Storefront

(View Live: <https://abovethegrovnd.com/>)

- Built a customized e-commerce storefront for a clothing brand, focusing on high-performance interactive UI and secure payment gateway integrations.
-

EDUCATION

Caleb University

BSc (Hons) Cyber Security | Lagos State, Nigeria

Sep 2022 - August 2025

- **Relevant Modules:** Cryptography and Network Security, Secure Software Development, Programming Fundamentals (Python, Java, C++), Risk Assessment and Security Policies, Internet of Things (IoT) Security, Mobile Application Development and Security, Web Application Security and Testing.
- **Projects:** Flickshot (TikTok clone application, Role: Team Lead), Password Manager Web App (Final year project).

Igbobi College

High School Diploma | Lagos, Nigeria

Sep 2012 – Jun 2019
